## PROFESSIONAL SUMMARY

Video Game Design and Development Graduate with a strong foundation in programming and interactive design. Specialized in solving technical and creative challenges, with a primary focus on gameplay logic implementation. I bring a comprehensive Full Stack perspective: from crafting innovative mechanics and UI/UX systems (Frontend) to optimizing scalable architectures and high-performance server-side logic (Backend). Committed to delivering robust, optimized code that elevates the gaming experience.

## GAME DEVELOPMENT EXPERIENCE

**Junior Video Game Developer (Independent Project) | 2024 – 2025**

- Collaborated on the development of an indie game, implementing core gameplay mechanics using Unity and C#.
- Optimized performance and integrated AI systems to enhance player immersion and NPC behavior.
- Developed internal tools for level balancing and character behavior fine-tuning.

## WEB DEVELOPMENT EXPERIENCE

**Freelance Web Developer (Full-stack Project) | 2024 – 2025**

- Developed a full-stack photo management platform using React and Node.js, enabling users to create, upload, and organize personal digital albums.
- Engineered and optimized relational databases using SQL to ensure data integrity, efficient metadata storage, and fast query performance.
- Built a responsive and intuitive UI with advanced features for dynamic image organization and personalized collection customization.
