LANGUAGES & OTHERS

- **Spanish & Valencian:** Native.
- **English:** Intermediate.
- **Driving License:** Category B.
- **Availability:** Full immediate availability.

EDUCATION

- **Master's in Data Science** | Evolve (Currently enrolled)
- **Bachelor's Degree in Video Game Design and Development |** Universitat Jaume I. TFG
- **High School Diploma** (Bachillerato) | IES Cap de l'aljub

PROFESSIONAL SUMMARY

A graduate in **Game Design and Development**, I transitioned to the field of **Data Science and Data Analytics** (currently pursuing a Master's degree at Evolve). I have a solid foundation in programming, systems logic, and software architecture, which allows me to approach data with an analytical and structured perspective.

I specialize in data extraction, cleaning, and modeling using **Python**, as well as creating interactive dashboards with **Power BI** to transform complex metrics into strategic business decisions and **SQL**. My background in Game Development gives me a unique advantage: a deep understanding of user behavior (UI/UX) and telemetry, enabling me to optimize both user retention and the performance of high-load systems.

SEMINARS AND CONFERENCES

I participated in the UJI Video Game Conference, attending Irene Bañón's (WildSphere) optimization masterclass and receiving training in cross-platform publishing with Catness Game Studios. I specialized in rendering architectures with Dr. Miguel Chover and procedural generation with AI under the direction of Raúl Montoliu. I also completed the scalable Full Stack architectures seminar at ESTCE, focusing on microservices integration, high-performance database management, and deployment in cloud environments.

SKILLS

- Data & AI: **Python** (AI and analytics), **SQL** (MySQL), **Power BI**, data cleaning and modeling.
- **Software Engineering**: C++, C#, JavaScript, Node.js, Java. Architecture and performance optimization.
- **Frontend** & UI/UX: React, interactivity, and user interface design.
- Tools & Methodologies: **Git**, Unity, AI methodologies, version control.
- **Team Management**: Leading technical projects in high-pressure, high-responsibility environments.
- **Problem Solving**: Analytical approach, advanced logic, and data-driven decision-making.
- **Planning**: Organizing activities according to strict protocols and focusing on team cohesion.

EXPERIENCE

Hospitality Assistant | Restaurante – Pizzería | 2017 – 2025

- Managed customer service, orders, and cash handling in a fast-paced environment.
- Developed strong work-under-pressure skills and operational efficiency, ensuring high customer satisfaction.

Water Sports Instructor | Bewater Sports Santa Pola | 2018 – 2026

- TextoPlanned and executed water activities (Paddle Surf, Sailing, Windsurfing) for diverse age groups.
- Led group management, fostered teamwork, and ensured strict safety protocols during sessions.

QA-Tester of VideoGames| Intern | LollipopRobots | 2024 – 2025

- I ran regression and functionality tests to identify flaws in mechanics, AI, and performance.
- I managed bug reporting and technical feedback, collaborating with development to optimize gameplay.
- I performed balance and edge case testing to ensure the final product's stability.

Web Developer | Restaurant Digital Transformation | 2025 – 2026

- Dedicated 5-month project focused on developing a high-performance frontend. I optimized the site by minimizing computational overhead and implementing advanced code rendering to ensure ultra-fast loading speeds.
- Developed a fully responsive design tailored for all devices and integrated an SEO-friendly architecture and dynamic menu management, significantly improving the business's digital presence and user retention.
